

GENEL TRANSPORT

# AUTOMOTIVE LOGISTICS

Take your place at the passenger seat and let our specialized automotive logistics team steer the wheel!

A silver car chassis is positioned on a blue automated assembly line in a large industrial factory. The car's hood is open, and its doors are also open. Above the car, there are complex mechanical arms and yellow robotic components. The background shows the extensive structure of the factory with various pipes, lights, and equipment.

# 30 000

An automobile consists of approximately 30,000 pieces counting in the smallest parts.

“  
Given its location, Turkey is one of the most important automotive manufacturing base of Eurasia!

***GENEL TRANSPORT***

**GENEL TRANSPORT**

The complex and evolving structure of automotive industry requires specific solutions to meet the requirements of customers in most cost effective and urgent manner. GENEL TRANSPORT understands the high demanding needs of the industry which includes multiple companies and multiple production stages.

We offer integrated, cost effective and expedited solutions for automotive spare parts suppliers, OEM, assembly and production plants as well as distribution companies. # Why us?

We are fluent  
in automotive  
language

We take over the  
workloads of suppliers  
by managing the  
process with buyers  
on their behalf.

We monitor all  
operations end to  
end and provide  
daily reports

We stick to  
Just-in Time  
philosophy

We are available  
24/7

We are experts in  
crisis management  
and know what it  
takes to make it  
happen

## OCEAN TRANSPORT
